

● FC CTC 2014-2018 No Risk or Slight Risk  
 ● FC CTC 2014-2018 Moderate Risk or Great Risk

## Perceived Risk

## Student Access

● FC CTC 2014-2018 Sort of Easy or Very Easy  
 ● FC CTC 2014-2018 Sort of Hard or Very Hard

● FC CTC 2014-2018 Not Wrong or A Little Bit Wrong  
 ● FC CTC 2014-2018 Wrong or Very Wrong

## Attitude Toward...

Over the span of 4 years, we can observe several trends. The perceived risk of alcohol, tobacco, and marijuana have remained very consistent over the years. In 2018, student access to alcohol increased largely from 2016, while the ease to access marijuana took a positive decrease in 2018. Lastly, student attitudes toward tobacco and alcohol have positively increased (use is wrong or very wrong), and we saw a large positive increase in attitude towards marijuana from 2014 to 2018.
