I should get tested for Hepatitis C if any of the following are true:

- I was born from 1945 through 1965
- I am a current or past user of shared needles
- I was treated for a blood clotting problem before 1987
- I received a blood transfusion or organ transplant before July 1992
- I am on long-term hemodialysis treatment
- I have abnormal liver tests or liver disease
- I work in health care or public safety and were exposed to blood through a needlestick or other sharp object injury
- I am infected with HIV
- I am a child born to an HCV-positive mother
- I have been in jail or prison
- I have used intranasal drugs before
- I got tattoos or body piercings from an unlicensed facility or in an informal setting

I should get tested for HIV if any of the following are true:

- I am between the ages of 13 and 64
- I am a man who have sex with men
- I have more than 1 sexual partner
- I am transgender who have sex with men
- I recently had a sexually transmitted infection (STI)
- I use injection drugs (IV)
